Sole material Double density PU/RU

Upper material Full grain leather

The waterproof AL GT Fire boot meets the requirements of the F1PA fire footwear standard. The boots also have an aluminium toe cap. The new profile of the rubber friction sole provides excellent grip on slippery surfaces and withstands temperatures up to 300°C. The FlexStep® mid-layer on the sole eliminates stress to the feet and spine. The boots are easy to pull on using the pull-on tabs on the sides.
